ADDITIONAL INFORMATION SUPPORTING njd (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite): **The project involves partially filling (15,690 sq ft) of a small basin (< 1 acre) within an existing concrete production facility. The purpose is to expand the existing operation. There is no evidence of any creek, drainage ditch or tile lines that would connect the impacted basin to other off site waters. The basin is vegetated with reed canary grass, and has no open water susceptible for boating use. Nor does it appear that the basin would be used for any type of commercial operation or nexus with interstate commerce.**
